JOB OBJECTIVES

To secure a senior IT leadership position where I can leverage over 25 years of experience in IT management, strategic planning, analytical skills and problem-solving ability, project management, technology management, digital transformation, service delivery, IT infrastructure, cloud technologies, network administration, cybersecurity, hardware, system, software asset management by ensuring software license compliance, and team leadership to optimize business operations, drive continuous improvement, and support long-term organizational growth.

PROFESSIONAL SUMMARY

Senior IT Executive with 25+ years of leadership experience delivering enterprise IT strategy, service delivery excellence, digital transformation, cybersecurity, cloud migration, infrastructure modernization, and software asset management. Proven record of leading cross-functional teams, improving SLA performance, reducing operational costs, and implementing technology solutions that support business growth and operational excellence. Experienced in managing multimillion-peso IT operations, vendor partnerships, enterprise applications, and IT governance.

CORE COMPETENCIES

- ❑ IT Strategy & Governance
- ❑ IT Service Management (ITIL)
- ❑ Digital Transformation / Digital Banking
- ❑ Cloud Migration
- ❑ IT Infrastructure Management
- ❑ Cybersecurity
- ❑ Disaster Recovery & Risk Management
- ❑ Budgeting and Resource Management
- ❑ Software Asset Management (SAM) and Software License Management (SaaS)
- ❑ IT Procurement and Asset Management
- ❑ Vendor Management
- ❑ Data Analytics (Power BI, SQL, Power Query, MS Excel, DAX)
- ❑ Cloud-based Software application tools (Odoo, SAP, HRM, Microsoft 365, and Quickbooks)
- ❑ Project and Program Management (Jira, MS Project, Planner, Monday.com, Slack, Trello)
- ❑ KPI & SLA OLA Management
- ❑ Agile & Scrum
- ❑ Quality Assurance and Compliance Auditing ABS-QE ISO 19011:2018, ISO 21001:2018
- ❑ Accreditation & Curriculum Design
- ❑ Faculty Development & Mentorship
- ❑ Academic Program Development

EDUCATION

- ❑ **Master in Business Administration**, PCU |2004 Graduate
- ❑ **Master in Sciences Computer Sciences**, AMA Computer College, (36 units Completed)
- ❑ **Bachelor of Science in Computer Science**, AMA Computer College, 1996 Graduate

WORK HISTORY

Service Delivery Manager

Apollo Global Center, Makati City | November 2025 up to present

Job Description:

Overseeing service delivery in alignment with client needs and agreed Service Level Agreements (SLAs). The primary emphasis is on establishing processes that ensure high levels of customer service and quality standards while maintaining cost-effectiveness.

The role involves acting as a temporary lead in the Team Lead's absence, providing initial support to ensure high-quality customer service while meeting and surpassing service level agreements (SLAs), operational level agreements (OLAs), key performance indicators (KPIs) and Data Analytics.

Responsibilities include:

Team Leadership & Coordination

- Manage 52 service desk, field engineers, other support teams across the organization
- Ensure the proper technical manpower allocation and work scheduling
- Ensure services are delivered according to agreed Service Level Agreement (SLA), Operational Level Agreements (OLAs) and Key Performance indicator (KPI)
- Manage daily operation of IT Support Service.
- Monitor the service performance (uptime, response time, and resolution time)
- Handle escalation and Issues and Change Management
- Oversee resolution of major incident and escalations
- Ensure the root cause analysis (RCA) is conducted for recurring issues
- Conduct Evaluation and Performance Measure Plan (EPMP)
- Create plans for IT Incident, IT Risk Management
- Initialize recovery of the service/project, Rollback, Runbook and Playbook
- Drive continuous quality improvement (CQI)
- Monitor the IT Assets through Asset Tracker App
- Work with cross functional department to aid the growth and development of team members
- Design and Create balance scorecard, dashboard reports to update the Senior Management Team of the Team's performance on a regular basis.
- Monitor Fintech specialized financial services (lending, payments, insurtech, and weathtech)
- Conduct testing and QA for E-wallet and rebates
- Monitor MSME Client accounts

Stakeholder & Client Management

- Act as the main point of the contact for clients or internal business units
- Conduct regular service review meetings and department meetings
- Manage expectation and ensure customer satisfaction

Vendors & Third Party Management

- Coordinate with external vendors (Telco, PSC 711 Stores, Hardware and Software providers)
- Ensure vendors meet contractual obligation and SLAs
- Manage escalation with suppliers

Compliance & Risk Management

- Ensure adherence to policies, standards and security requirements
- Identify risks and management mitigation plans

Budget & Resource Planning

- Manage service delivery budget
- Forecast resources and device requirements
- Optimize cost vs. service quality
- Spearhead the IT Procurement and renewal of software licenses

Key Achievements:

- Increased **SLA compliance from 85% to 97%** by redesigning ticket routing and escalation processes.
- Reduced **incident resolution time by 30–40%** by improving service desk workflows.
- Cut recurring incidents by **25–40%** through structured Root Cause Analysis (RCA).
- Reduced ticket backlog by **38%** by introducing automation and AI-assisted workflows.
- Improved operational efficiency while reducing service delivery costs by **15–25%** through resource optimization.
- Achieved **99.9% service availability** across critical systems.
- Led deployment of new store locations with **zero major incidents**.
- Streamline Operational processes and Data Processes by **16%** results to increase manpower productivity
- Developed executive dashboards using **Metabase, Power Query, SQL** and **Power BI** for real-time operational reporting and decision making.
